KIP Customer Care Center Technical Product Support

800.252.6793

KC3@kipamerica.com

Providing WSCA customers with fast, reliable and flexible technical support is just as important to us - the kind of support you've often expected but rarely received from others.

- 8:30am – 8pm EST availability
- Certified factory trained KIP technicians
- Rapid response times
- Efficient issue diagnosis
- Swift and effective resolution

All KIP certified technicians are extensively trained at our national and regional training facilities. Please be prepared to provide the KIP product model, serial number, description of the issue and contact information for a returned call. The model and serial number information can be easily accessed by selecting the “Guides” option on your KIP product touch screen as shown to the right. We look forward to serving you.
